

Plastic Cleaner

Introduction

Technical sprays are used in nearly all sectors of modern industry. These sprays are used for care and protection of surfaces, for cleaning, degreasing, dissolving and separating and are essential in daily business.

Plastic Cleaner is the ideal product for the cleaning and degreasing of sensitive surfaces.*

Due to the use of aggressive cleaners, many plastics, for example, are attacked in such a way that their surface structure is changed. Stress cracks, brittleness, and/or matt surfaces are the result.

A further use of these materials is often not possible for optical or technical reasons. Due to a special formula, Plastic Cleaner prevents all types of damage. It is thus particularly suited for surface treatment in the adhesion of sensitive plastics, rubbers, or even painted surfaces. In comparison with conventional thinners, Plastic Cleaner evaporates without residue.

* Check surface compatibility prior to use

Applications

- Cleaning and degreasing of:
 - Sensitive plastics like thermoplasts (PVC, PMMA = plexiglass, polystyrene, etc.), e.g. window frames, roller blinds, plastic profiles
 - Rubber materials such as seals
 - Lacquered surfaces, such as powder-coated metal parts
- Removal of label and sticker remainders

Technical data

Colour	colourless
Odour	citrus
Temperature resistance	--- °C
Shelf life (minimum)	24 months
Special features	For sensitive plastic surfaces

Processing

Spray the part that is to be cleaned thoroughly and if necessary wipe it off with a clean cloth. Repeat this action in the event of stubborn stains.

Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products.

However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended.

A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
